

Birds seen in the Marshall Weidner Garden, and what attracts them:

We have a bog and waterfall in the back yard, fountains in front and side yard, and a plethora of native plants that provide nectar, berries, seeds, and insects.

To keep birds and cats safe, our cat is an indoor cat. Only. We have feeders for hummingbirds, orioles, woodpeckers, finches. We let some plants go to seed. We provide nesting box for bluebirds, and a brush pile for quail to shelter in.
